SECTION-1

Lab_pr_1-1   Write an algorithm and draw the flow chart to compute the smallest of three numbers.

Algorithm:

```
ComputeSmallestOfThree ( X,     Y,      Z)

/*this algorithm takes three integers as input, compute smallest among the
three and display the result*/

1. Set smallest = X    /*smallest represent the smallest number*/
2. If    Y < smallest then :
     Set smallest = Y
3. If   Z < smallest  then :
     Set smallest = Z
4. Write: smallest    /*this will display the result*/
```

Flow Chart:
